

Sensitivity of each percentile to real GDP growth

— Q1 (smallest 20%) — Q2 — Q3 — Q4 — Q5 (largest 20%)

Note: Each point is the OLS slope from regressing the quarterly p-th percentile of one-quarter changes, within a size quintile, on four-quarter real GDP growth (percentage points); 1992Q2–2026Q2. Bands: ± 2 Newey–West (4-lag) standard errors, shown for Q1 and Q5. Descriptive only; GDP growth is not an exogenous shock.
