

Change in net interest margin (pp)

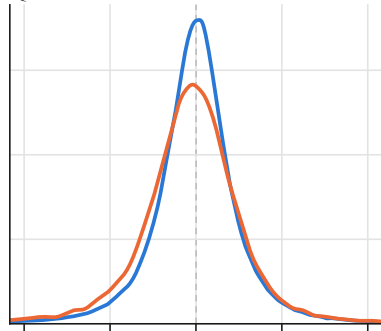

— Expansion

— Recession

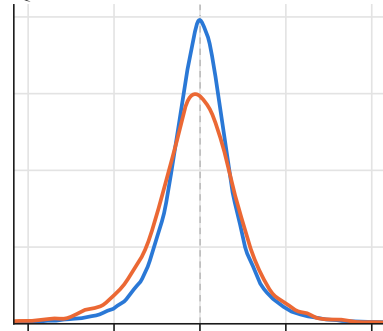

Q1 (smallest 20%)

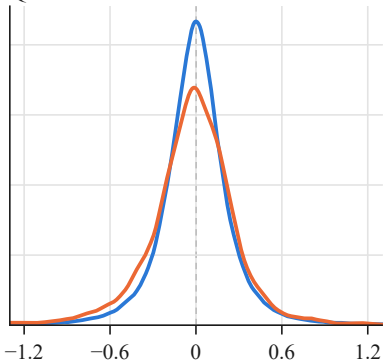

Q2

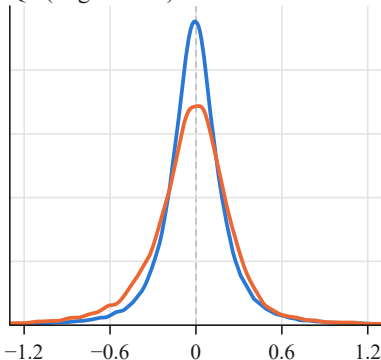

Q3

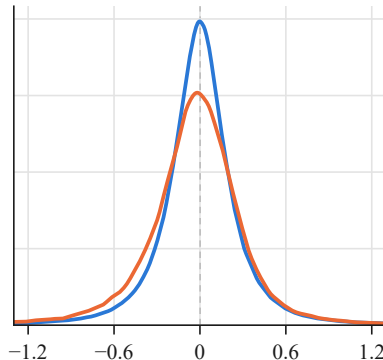

Q4

Q5 (largest 20%)

All banks

Note: Gaussian kernel densities, Silverman bandwidth, estimated separately for expansion and recession quarters (quarters overlapping an NBER recession). Quintiles are formed each quarter from total assets at $t-1$. Percentage-point change in each bank's single-quarter net interest margin (annualized) from the previous quarter.
